DEVELOPMENT EXPERIENCE

React Native Mobile Chat App – 06.2023

- Developed using React Native, specifically designed for seamless usage on mobile devices. Alongside its messaging capabilities, the app also incorporates convenient features that allow users to share images and their current location.

MEET [Serverless PWA with React and TDD] – 05.2023

- Serverless, progressive web application (PWA) built with React using a test-driven development (TDD) approach. The app fetches upcoming events using the Google Calendar API and displays them in an interactive and visually appealing manner.

myFlix React App [Client-Side and Server-Side] – 03.2023

- A movie app built using the MERN (MongoDB, Express, React, and Node.js) stack. This app allows movie enthusiasts to access information about different movies, create a profile to save their favorite movies, and interact with various features such as filtering, sorting, and viewing movie details.

EMPLOYMENT

PlaybookUX, New York — Freelance UX Tester

APRIL 2024 - PRESENT

- Evaluate user experiences by conducting thorough reviews of web applications and interfaces to ensure intuitive navigation and functionality.
